TOX®-FinePress
Benchtop presses 2 – 57 kN

Data sheet 60.10
2019/05
2.5 – 25 kN

**Changing the force-travel-characteristic**
A change in the characteristic of force and travel is possible by simple repositioning of the toggle lever.

**Caution:** Changing the toggle lever position results in a change of the max. press force and the max. stroke (see tables).

**Optional accessories:**
- Ergonomic side grip ZEH
- Electric counter ZEZ, long life battery operated
- Return stroke lock ZR-L
- Travel sensor ZW-K
- Tool fixture ZA. Also available with 3-in-1 tool clamping concept, with or without force sensor, or as type ZF with fine micrometer adjustment for precise setting of the bottom dead center
- Connection of optional electrical accessories is made easy due to the default interface included in scope of delivery
- More accessories:
  - Pressing monitor
  - Mounting of slide tables according to frame type

**Ordering example:**

KFS 008 + options e.g.

- max. press force
- Toggle Press

+ ZR-L2.002
  - Return stroke lock

+ ZEZ 001
  - Counter

Please order all other accessories and controls separately. The press heads of this series are available separately.

Rack and Pinion Presses ZF

2.5 – 4 kN

The Rack and Pinion Presses transmit the pull force on the lever into a high force at the ram. Constant press force throughout the entire working stroke.

With stop screw for precise end of stroke adjustment.

Optional accessories:

- Ergonomic side grip ZEH
- Electric counter ZEZ, long life battery operated
- Return stroke lock
- Travel sensor ZW-Z
- Tool fixture ZA. Also available with 3-in-1 tool clamping concept, with or without force sensor
- Connection of optional electrical accessories is made easy due to the default interface included in scope of delivery
- More accessories:
  - Pressing monitor
  - Mounting of slide tables according to frame type

Ordering example:

ZFS 004 + options e.g.

Pneumatic Presses PF

2 – 57.5 kN

The TOX®-Pneumatic Cylinder features the latest seal technology for smooth, trouble-free operation. These seals provide a more reliable operation than pneumatic cylinders with flat seals.

- Adjustable end position damping
- Clean plumbing. Air connections integrated on frame
- Stroke adjustment over entire travel

Optional accessories

- Electric counter ZPZ, long life battery operated incl. pressure switch
- Travel sensor ZW-P
- Home position sensor ZOT mounted on tie rods
- End position sensor ZUT with stroke adjustment. No sensor adjustment required if stroke is adjusted
- Tool fixture ZA. Also available with 3-in-1 tool clamping concept, with or without force sensor
- Connection of optional electrical accessories is made easy due to the default interface included in scope of delivery
- More accessories:
  - Pressing monitor
  - Mounting of slide tables according to frame type

Ordering example:

PFL 004 + options e.g.

+ ZUT 000 End position sensor
+ ZPZ 001 Counter
+ STP 03-10 2-hand safety controls

Please order all other accessories and controls separately. The press heads of this series are available separately.

Pneumatic Presses with manual approach PFH

8.5 – 57.5 kN

Pneumatic Presses with hand lever toggle mechanism for 54mm approach stroke and max. 6mm power stroke. From 8.5 – 57.5kN, high precision, no guide adjustment required, non-rotating ram.

- In compliance with the EC type examination certificate
- Clean plumbing. Air connections integrated on frame
- Fine stroke adjustment during power stroke (6mm)
- Return force/tool weight is infinitely adjustable
- Default interface for easy connection of electrical components
- Controls completely integrated on frame, including air servicing unit
- The hand lever can be mounted on left side too for all models

Function:
The press ram is moved forward over a toggle mechanism by pulling on the hand lever. Pressing the start button on the lever, after a limit switch is tripped, results in a 6mm long pneumatic power stroke. Releasing the lever or the start button ends the power stroke.

Optional accessories

- Electric counter ZPZ, long life battery operated incl. pressure switch
- Travel sensor ZW-PH
- Tool fixture ZA. Also available with 3-in-1 tool clamping concept, with or without force sensor
- More accessories:
  - Pressing monitor
  - Mounting of slide tables according to frame type

Ordering example:

PFHL 008 + options e.g.

- Max. press force
- Pneumatic Press with manual approach frame

+ ZAK-K08

- Tool fixture with force sensor

+ ZPZ 001

- Counter

Please order all other accessories and controls separately. The press heads of this series are available separately.

Universal base FinePress UUF 1-045.100

Base as frame construction made of aluminium profiles with housing. Table board made of steel (RAL 7035 light grey). Meets latest ergonomic guidelines for maximum operator comfort.
Max. load 900 kg, with swivel casters mounted 500 kg.

Accessories

Universal base FinePress UUF 1-045.100

Order no.
- UUF 1-45 Standard base with steel top and leveling feet

Option Swivel casters

Order no. option
- ZUUF 1-45 R Swivel casters

Counter

With the help of the electric counter type ZEZ and the pneumatic counter type ZPZ, the production quantities can be displayed on the eight digit display. The counters can be easily mounted on any press. The electrical counter is powered by a long life battery. No external power supply required!

Order no.
- ZEZ 001 Electric counter for manual presses
- ZPZ 001 Pneumatic counter for pneumatic presses
Tool fixture ZA

This simple tool fixture is screwed into the ram thread. It centers the tool via the precision bore D and provides fixation of the tool using a set screw. Other tool fixtures with different bore sizes D are available on request.

3 in 1 – the perfect tool fixture concept for long term investment

In most conventional small presses, the tool is mounted directly on the press ram and is held in place with a set screw. If the thread in the set screw bore is damaged, the ram has to be replaced, which is expensive. Therefore, TOX® PRESSOTECHNIK has developed the 3 in 1 solution for:

1. Cylindrical threaded centering pilot
2. Cylindrical clamping shank without threads
3. Clamping shank per DIN 9859, with set screw mount

Caution: Press force must be carried over the entire surface ØD!

Choice 1
The tool can be inserted directly into the threaded pilot bore.

Choice 2
Clamping disc elements provide high radial clamping forces for a strong connection. Advantage: No damage to tool fixture. Zero clearance and detachable. Tool weight max. 4 kg.

Choice 3
Conventional set screw clamping is also possible for existing tooling. Advantage: Prevents damage to ram.

SW 46 has a height of 11 mm. A suitable open end wrench type CZG (8 mm) can be found in TOX® data sheet 80.100.
3 in 1 Tool fixture ZF with fine adjustment for Toggle Presses

Micrometer adjustment for end of stroke
Toggle Presses reach their maximum force at the bottom dead center. The micrometer fine adjustment allows for precise stroke adjustment in a 1/100 mm range. This tool fixture offers three tool mounting possibilities 1, 2, 3 (see page 11).

Slide table ZHST

- Integrated end of stroke dampening for smooth operation
- Can be integrated into fully automated production lines
- Tool weight max. 40 kg
- Can be used with all presses up to 150 kN (except Type PFS 002)

Technical details

- Precision linear ball rail guide
- Self-locking in working position
- Pneumatic cylinder for automatic operation (optional)
- Adjustable positive stop

Special accessories
To be ordered separately for slide table ZHST 080.160 P:
- End position sensors for pull and push cylinders order no. ZHSP 001.000

Ordering example:
ZHST 080.160 P
Pneumatic drive

Return stroke lock ZR-L

1. Home position of the press.
2. At this position of the return stroke, the lock is activated again.
3. First ratchet position: Loose workpieces can still be aligned.
4. Ratchet position in end position: The return stroke lock is released after the ram reaches the selected end position. This guarantees the process repeatability and therefore a constant usage. The locking function can be set to any position within the stroke.
5. The emergency knob releases the locking function in any position.

Order no. ZR-L 2.002

Ergonomic side grip ZEH

Ergonomic grip can be mounted and rotated anywhere along the hand lever.

Order no. ZEH 018

Hand lever extension 150 mm

Intended solely to reduce the required manual force, not to increase the press force.

Order no. HH 018.150
