

TOX® PRESSOTECHNIK was awarded the EFB seal of approval „Innovative Alliance“

Formatiert: Links: 2,5 cm, Rechts: 2,5 cm, Oben: 2,5 cm, Kopfzeilenabstand vom Rand: 1,25 cm, Fußzeilenabstand vom Rand: 1,25 cm

The Southern German technology enterprise TOX® PRESSOTECHNIK GmbH & Co. KG, D-88250 Weingarten was able to crown its successful trade fair attendance of EuroBLECH 2012, Hanover, with a pleasant surprise: during a ceremony organized on Wednesday, October 24th 2012, by EFB Europäische Forschungsgemeinschaft für Blechverarbeitung e. V. (European Research Association for Sheet Metal Working) in Hanover, Dr.-Ing. Wolfgang Pfeiffer, as Managing Director and as representative of all the employees of TOX® PRESSOTECHNIK, received the certificate of the EFB seal of approval „Innovative Alliance“, awarded for the first time. The award was personally presented by Dipl.-Ing. Wilfried Jakob, President, and Dr.-Ing. Norbert Wellmann, Managing Director of EFB. The EFB seal of approval „Innovative Allianz“ is awarded to „enterprises and research institutes, which have been involved in EFB’s research network for many years and which promote the pre-competitive research in the fields of material, production technique, and quality assurance in sheet metal working“. With the EFB seal of approval, TOX® PRESSOTECHNIK adds another important specimen to its impressive list of national and international awards and certificates which especially underlines the innovation capability and thus the sustainability of the enterprise.

EFB-Gütesiegel „Innovative Allianz“

Entwurf: Laurentius Sommer
Hochschule Hannover

Forschende Unternehmen und Einrichtungen, die erfolgreich innovative Technologien entwickeln und implementieren, steigern mit ihrem Ideenreichtum und ihrer Ingenieurskunst die Wettbewerbsfähigkeit, schaffen zukunftssichere Arbeitsplätze und sichern Wohlstand und Lebensqualität. Die EFB Europäische Forschungsgesellschaft für Blechverarbeitung e.V. vergibt das Gütesiegel „Innovative Allianz“ an Mitglieder, die sich im Branchen Netzwerk der Unternehmen und Forschungseinrichtungen engagieren und die vorwettbewerbliche Forschung in den Bereichen Werkstoffe, Produktionsverfahren und Qualitätssicherung der Blechverarbeitung vorantreiben.

Das Unternehmen

**TOX PRESSOTECHNIK GmbH & Co. KG,
Weingarten**

hat sich durch die langjährige kontinuierliche Mitarbeit in der Innovativen Allianz der EFB besonders ausgezeichnet.

Hannover, den 24. Oktober 2012

Dipl.-Ing. Wilfried Jakob
Präsident der EFB

Dr.-Ing. Norbert Wellmann
Geschäftsführer der EFB
